

**S 92**

Seat made of high impact top quality polypropylene, 100% HD recyclable, to be installed on fixed platform. Anti-UV light treatment applied for outdoor seating (accessory).

The seat incorporates an anti-slip scratch layer, as well as a drain hole.

It has a closed perimeter in order to facilitate cleaning.

A numbering laser engraved plate is supplied with the seat.

Direct fixation to the platform is achieved by means of two special anchoring, and fixation to the riser by means of a mono-tube. Optionally (as an accessory), the seat can also be installed in a 2 or 3 seat bench.

Weight: 1.550 Kg

Volume: 0.02 m<sup>3</sup>

The seat meets the UEFA & FIFA regulations (backrest between 300 and 350mm, depth between 350 and 400mm, width between 400 and 480mm). Besides, it also fulfills the following certifications:

- M3 Fire resistance (optionally M2), according to UNE 23727 regulations.
- U.V. light resistance, according to DIN 54003 regulations.
- Bending resistance, according to DIN 53455 regulations.
- Impact resistance, according to DIN 53453 regulations.
