

**S 96 FG / S 96 GTR**

Seat made of high impact top quality polypropylene, 100% HD recyclable, to be installed on fixed or telescopic platform.  
Anti-UV light treatment applied for outdoor seating (accessory).

Automatic folding system by counterweight (the seat in model S 96 GTR or the backrest in model S 96 FG).

Direct fixation to the platform is achieved by means of four special anchoring.

Seat and backrest are mounted on a metal structure made of steel profiles and plates, 5mm thick. For indoor use, the metal structure is finished in epoxy powder 80 micron, or cold galvanized; for outdoor use, it is hot galvanized.

The seat incorporates an anti-slip scratch layer.

A numbering laser engraved plate is supplied with the seat.

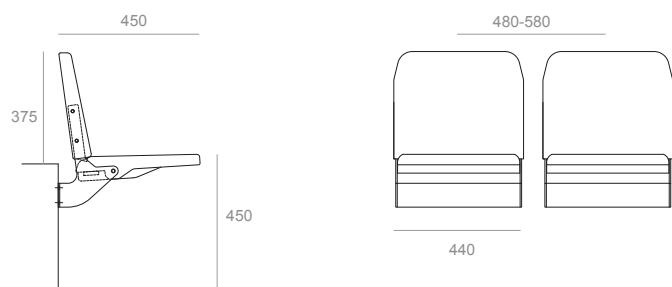

Weight: 8.1 Kg  
Volume: 0.050 m3

The seat meets the following certifications:

- M3 Fire resistance (optionally M2), according to UNE 23727 regulations.
- U.V. light resistance, according to DIN 54003 regulations.
- Bending resistance, according to DIN 53455 regulations.
- Impact resistance, according to DIN 53453 regulations.
